

April 14, 2021

This is to inform the community that Cooper Creek Cedar Ltd is in the process of processing approximately four logging truck loads of right-of-way timber that was generated in December 2020 during the road construction of the spur in CP 405 (Salisbury Creek to Bulmer Creek). The spur starts in block 2 and traverses into block 1. The +/- four loads will be hauled from the spur in the next 2-3 weeks.

Cooper Creek Cedar Ltd will not be erecting signage at the beginning of the Argenta highway or putting up kilometer signs to the Salisbury forestry road for this project. CCC is not putting up the signs to avoid confusion and concern. Today, CCC does not have a proposed schedule to begin harvesting operations in CP 405. The signage and the kilometer markers will be installed prior to harvesting/hauling operations begin in CP 405.
